

A new advance in the electro-magnetic treatment of water

Aqua-4D[®] E is the latest generation of products in the development of physical and electromagnetic water treatment. The integration of the latest scientific and technical advances now allows this technology to finally breakthrough.

An innovating, hi-tec and modular system

Command 60E, Command 60E Pro, Command 360E Pro, Tube 60E and Tube 360E devices are the fifth generation of physical water treatment products designed and manufactured by Planet Horizons Technologies.

This modular system is composed of a wall mounted control unit, connected to electromagnetic delivery tubes mounted in parallel with the treated water pipes.

Control Units (Commands)

Command 60 E

- Control unit that can operate up to 4 Tubes 60E
- Flow rate from 0 to 240 L/min, 14.4 m³/h

Command 60 E Pro

- Control unit that can operate up to 4 Tubes 60E
- Flow rate from 0 to 240 L/min, 14.4 m³/h
- Alarm output on a relay
- Synchronization between several Commands (up to 32)
- Ability to set EM signals for specific applications

Command 360 E Pro

- Control unit that can operate up to 6 Tubes 360E
- Flow rate from 0 to 2160 L/min, 129.6 m³/h
- Alarm output on a relay
- Synchronization between several Commands (up to 32)
- Possibility to set EM signals for specific applications
- IP 67

Tubes

Tube 60 E

- Maximum flow rate: 60 L/min (3.6 m³/h)
- IP65

Tube 360 E

- Maximum flow rate: 360 L/min (21.6 m³/h)
- IP65
